If you organise an event specifically for female business owners, do consider having Tineke as a speaker. She is a female business owner for 30 years, situated in The Netherlands. She is a highly skilled and trained keynote speaker. She is trained by the best speakers trainers in the world such as Andy Harrington, T. Harv Eker and Blair Singer.

She works with female business owners to work **ON** their business, instead of **IN** their business, with the model that Tineke created.

For a brief introduction about Tineke please watch this short video:

## Short Bio

When Tineke was born she was supposed to be a boy, (according to her father). She must have felt this somehow because she loved playing with boys when she was little. She entered a male-dominated sport (whitewater kayaking) and she started a business in the outdoor and survival industry. After 22 years, she sold this business in this male-dominated industry.

She had no idea that women did business in a totally different way. Most of the female business she knew off, were not thriving. Comparing this with her experience in the men's world, she could immediately see why this is the case.

Women have a perfect product or service, and they have the right people to work with and treat them and their customers very well, but the business is usually financially not as healthy as it can be.

What if women would adopt some of the male skills but do this in their own female way. Tineke thought?

She started a survey about female entrepreneurship in her own country, the Netherlands. She wanted to know what was specific about the way they do business and what is different about doing business for men. She wrote a report about this study and published it.

**More about Tineke:**

She is a mother of 2 beautiful daughters. She was a member of 2 national sports teams. She competed in euro- and world cups to represent her country, The Netherlands.

She is passionate about helping women grow their business because she believes that when more women have bigger businesses the business world will change for the better.

### What your audience will learn

If you consider hiring Tineke as a speaker you are assured that your audience will be:

- Motivated
- Have new insights
- Aware where their current limitations are
- Aware of their position compared to other female business owners in the world and know how to change this.
- Exceeding their expectations during a spectacular exercise, that Tineke does with the audience. (Depending on the time of the speaker-slot)
- Participating in the presentation, because Tineke puts the audience at work

The major topic that Tineke likes to speak about is her thorough study of female entrepreneurship. Because there are few facts to be found on the internet, about how women do business, Therefore Tineke decided to do her own research.

In 2016 she questioned nearly 400 female entrepreneurs. Business owners and self-employed women.

This resulted in a thought-row report with a lot of figures and diagrams. Sometimes a difference is made between self-employed entrepreneurs and business owners. And as to be expected there is a difference in the way these two are doing business.

Besides that, there are also tips for female business owners to grow personally and business-wise.

During Tineke's presentation, she likes to talk about a few highlights from this report.

### Talkshow the Power of Women in Business

By the way, I received the most AHA moment of the conference during your keynote.

It was when you said think of your goals for the next 6 months, now think of why it won't happen.

**Arzu GEDIKLI BELHAOUES***Export Sales Manager at Jacquet-Brossard*

Hi Tineke, thanks for getting in touch. It was a nice meeting out there. I strongly believe in Woman power. However I cannot be called feminist. Especially on this Saturday we met, I was thinking that woman and man are complementary. And I got convinced during your speech. Many thanks for this. Any reading you can advice me would be very welcome.

All the best Tineke,  
Arzu
